SUMMARY

Full Stack Engineer with 5+ years of experience building enterprise applications with React, TypeScript, Node.js, and Java/Spring Boot. Currently focused on developer platform engineering and on automating engineering operations with AI agents, MCP integrations, and AI-assisted development workflows. Experienced in cloud-native and serverless architecture on AWS, REST APIs and microservices, CI/CD and observability, and legacy system modernization. Brings a blockchain background (R3-certified Corda developer; Ethereum, Hyperledger Besu), with a track record of delivering production systems for global clients across the full SDLC.

WORK EXPERIENCE

Senior Associate Consultant, Infosys Ltd **Oct 2024 - Present**

- Modernized a legacy COBOL-based enterprise platform into a cloud-native application, building scalable frontend components, backend services, and REST APIs for business-critical workflows using React, TypeScript, Node.js, Java/Spring Boot, AWS Lambda, and PostgreSQL.
- Built and maintained frontend and backend plugins for a Backstage-based internal developer portal (React, TypeScript, Node.js), covering software catalog ingestion, GitHub integrations, TechDocs, and secure API proxy routes.
- Improved platform reliability by fixing production issues, hardening service-to-service authentication, and handling GitHub API rate limits, using Datadog and Splunk for diagnosis.
- Worked across the full SDLC, from requirements through testing, CI/CD deployment, and production support, collaborating with architects, business analysts, QA engineers, and client stakeholders in Agile teams.
- Built AI-assisted development proofs of concept and reusable AI workflows (Claude, GitHub Copilot, Claude Code skills, agents, and MCP integrations) for implementation, debugging, documentation, code review, and ticket triage, improving team productivity.

Senior Software Engineer, Persistent Systems Ltd **Jan 2021 - Aug 2024**

- Designed and developed enterprise applications using React, Angular, Node.js, Java, and Spring Boot across blockchain and traditional enterprise ecosystems.
- Built frontend modules and backend services following microservice architecture principles.
- Developed REST APIs, integrated enterprise systems, and implemented backend business logic.
- Worked extensively on Security Tokenization, CBDC, Digital Identity, SSI, and Supply Chain blockchain solutions.
- Built Proof of Concepts using Ethereum, Polygon, Hyperledger Besu, and Corda.
- Participated in architecture discussions, system design, debugging, testing, and production support.
- Worked with distributed Agile teams delivering enterprise-grade software to international clients.

PROJECTS

QR Based Attendance Management Platform

- Designing a modern attendance management SaaS using React, FastAPI, PostgreSQL, and role-based access control.
- Architecting scalable backend APIs, authentication, reporting, and future AI-assisted administrative workflows.

AI Engineering Workflows

- Built reusable Claude-based development workflows to accelerate code generation, refactoring, debugging, documentation, and project scaffolding.
- Designed structured prompts, skills and reusable context agents to improve consistency and developer productivity across software projects.

Enterprise Blockchain Proofs of Concept

- Developed prototypes demonstrating digital identity, tokenization, and decentralized workflow automation using Ethereum, Hyperledger Besu, and Corda.

EDUCATION

Bachelor of Technology (Computer Engineering), Vishwakarma University **Jun 2017 - Jun 2021**

University of Engineering and Technology

- Specialization in Data Analytics

SKILLS

- **Technical Skills:** React, NodeJS, Java, Spring Boot, Object Oriented Programming (OOP), TypeScript, JavaScript (ES6+), SQL, REST APIs, Serverless, Microservices, Spring MVC, Spring Data JPA, Agile, AWS lambda, Git, SDLC, Ethereum, Corda, Hyperledger Besu, Claude API, MCPs, LangChain, Agentic development, Copilot, Multi-Agent Workflows
- **Tools:** VSCode, GitHub, Copilot, Claude Code, Azure DevOps, Jira, Linear-B, PGAdmin
- **Languages:** English, Japanese (Business level), Hindi, Marathi, Gujarati
- **Certifications:** R3 Certified Corda Developer (2023), R3 Certified Corda Business Professional (2023), Japanese Language Proficiency Test (JLPT N3) (2023), Frontend Web Development with React (2020)
